

Pneumatics is changing air that is wherever and infinitely available in the world to power energy. You might seldom see its actual applications, but currently pneumatic equipment are used in production and conveyer lines in almost all industries.

VPC company, which was founded in 1985, as a leading manufacturer, is dedicated to serve the automation and labor saving requirements with our pneumatic product range.

Above, coupled with close connection with customers' requirements, enables us to manufacture and make good valve, high quality products and to operate successfully around the world. As natural result of such policy VPC has been recognized to be in compliance with the requirements as provided for the quality system standard ISO9001:2000, as well as the CE Certificate, which is the first pneumatic enterprise who get both certificates in Ningbo, China.

VPC built an excellent sales team is taking advantage of a widespread net of local and foreign distributor constant expansion in the main worldwide strategic areas. We believe the diversity of our product line, and the sincere work of our staff will make VPC to be world class performance leaders of pneumatic products.

Sincere Service
Good Quality

Cylinder

UserManual

1. Before screwing the correct fitting in, make sure the thread ports and fittings are clean. Be aware of dust or fitting tap falling into the cylinder;
2. It is suggested to use the medium lubricated by 40um filter element;
3. Under the high-temperature environment, use the high-temperature type cylinder. Under the low-temperature environment, take measure to avoid frozen;
4. In order to prevent damaging the cylinder, test the cylinder with loading first and adjust the cushion tightly.
5. In order for the cylinder to achieve long service life, do not side-load cylinder,
6. If the fittings were removed from the cylinder for a period of time, be sure to block the thread port with protecting cap to keep the dust away.

Caution

1. To remove the rust, external impurity and water, please install a filter near to the directional valve.
2. Please use galvanized pipe, nylon tube, rubber pipe etc corrosion resistant pipe materials.
3. For the piping between the cylinder and the directional control valve, please confirm section have effective cross-sectional area of the provisions of the velocity of the piston must be.
4. Piping before the removal of external impurity in the tube, chip etc. Please use compressed air to clean.
5. When connected with the component products, please do not mix with the sealing belt and other foreign bodies.
6. And in poor rod load please keep in axial state.

Maintenance

1. The most suitable temperature for the use of the cylinder is 5-60°C, when the temperature exceeds 60°C, please consider to change the material of the seal ;if the temperature is below 5°C, due to the freezing of water in the loop, there may become an accident, please consider to prevent freezing.
2. Please don't use cylinder corrosion environment , otherwise they will be damaged or dysfunctional if must be used in such an environment, please consult with VPC for solution.
3. Compressed air used must be clean and less water.
4. The purpose of the buffer is to use the energy of the air to absorb the kinetic energy of the moving parts, so that the piston and the end cover are not impacted at the end of the stroke.
5. Pneumatic buffer at the factory has been adjusted. Due to the variation of load to adjust the buffer can slowly rotate to the right needle, counterclockwise is weakened.
6. Please do not use the cylinder directly to the cutting fluid, cooling environment, please add the dust cover on the cylinder.

Tips

1. Cylinder can be caused by using the cylinder in the large inertia of the super-permitted range.
2. Please do not beat the cylinder, resulting in injuries, which well cause the cause of bad action.
3. Please install in the horizontal plane, if the installation surface is nueven, may cause the cylinder is damaged.
4. Attention to the inertia force due to external forces, and sometimes lead to negative pressure in the cylinder, so that the cylinder seal off, causing the external leakage.

Specifications 4S Series Solenoid Valve(2 Position 5 Port Double Control)

Model	4S120-06	4S220-08	4S320-10	4S420-15
Working Medium	Clean air(40µm Filtration)			
Acting Type	Internal Guide			
Joint Size	Import=1/8 Export=1/8 Exhaust=1/8	Import=1/4 Export=1/4 Exhaust=1/8	Import=3/8 Export=3/8 Exhaust=1/4	Import=1/2 Export=1/2 Exhaust=1/2
Sectional Area	18mm ²	18mm ²	50mm ²	50mm ²
Flow	799NI/min	799NI/min	1554NI/min	2220NI/min
Working Pressure	0.2~0.8Mpa			
Max.Pressure	1.2Mpa			
Working Temperature	-5~60℃			
Voltage Range	-15%~10%			
Heat Resistant Grade	B			
Protective Class	IP65(DIN40050)			
Coil Type	Din type、Flying leads			
Max.Acting Frequency	5Times/S		4Times/S	3Times/S

4V Series Solenoid Valve

Product features:

- * Stable life cycle,guaranteed 10,000,0000 times;
- * Various voltage and working style are available;
- * Different surface treatment,thread types
- *(G、NPT、PT、BSPP、BSPT)are available.

VSV Series Micro Solenoid Valve

Ordering Code VSV Series Micro Solenoid Valve

Specifications

Model	VSV23-10V	VSV23-10H	VSV23-10C
Working Medium	Clean Air(40μm filtration)		
Acting Type	3/2 N.C 3/2N.O		
Working Pressure	0~0.7Mpa		
Ambient Temp.	-5~50℃		
Orifice Size	1.0mm (R port) / 0.75mm (P port)		
Lubrication	No		
Flow rate at 6bar and Δp=1bar	P1→P2 16NL/min P2→P3 23NL/min		
Response time	Less than 10ms		
Nominal voltage	DC24V/AC220v		
Voltage Range	Rated Voltage: ±10%		
Duty cycle	ED 100%		
Max Working Frequency	30HZ		
Insulation Class	H Class		
Degree of protection	IP50		
Life time expectancy	More than 50 million times

VSV Series Micro Solenoid Valve

Ordering Code VSV Series Micro Solenoid Valve

Specifications

Model	VSV15-1.4LV	VSV15-1.4LH	VSV15-1.4LC
Working Medium	Clean Air(40µm filtration)		
Acting Type	Normal Close Direction Type		
Working Pressure	0~0.7Mpa		
Ambient Temp.	-5~50°C		
Reflect Time	≤20m/s		
Max Working Frequency	20Times/S		
Manual Mode	Button Type		
Lubrication	No		
Heat-resistant Class	F Class		
Protective Class	IP65		
Rated Voltage	DC24V		
Voltage Range	Rated Voltage: ±10%		
Orifice	1.4mm		
Power	2.3W (With LED)		
Coil Type	Vertical Type	Horizontal Type	Pin Type

Product features:

VF Series directional 5/2 way valve include pilot valve and air valve, the valve body from 1/4" to 3/8" with both flying leads type and DIN type coil, Installed on suitable manifold, many valves can working together.

Specifications

Working Medium	Clean air(40μm Filtration)
Acting type	Pilot type
Sectional area	17.1mm ²
Working Pressure	0.15~0.8Mpa
Guaranteed pressure	1.2Mpa
Working Temperature	-10~60℃
Voltage Range	-15%~10%
Standard voltage	AC:110V,220V,DC:12V,24V
Insulation	Class F
Protective Class	IP65
Max. acting frequency	5 cycles/s
Activate time	<0.05
Seal	Anti-dust
Manual operation	Screwdriver locked type
